

MOHSIN ISHFAQ

Full Stack Developer • React.js • Node.js • ASP.NET • SQL Server

Rawalpindi, Pakistan | mohsinishfaq500@gmail.com | +92 343 5520230 | linkedin.com/in/mohsin-ishfaq-2226b6299 | github.com/Mosiiikhan

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on production experience building scalable web applications using React.js, Node.js, ASP.NET, and SQL Server. Proven ability to independently deliver end-to-end solutions — from RESTful API architecture to responsive UI — across real-world environments. Brings a unique advantage of professional client-facing communication skills developed through stakeholder-management experience, making me an effective collaborator on cross-functional engineering teams. Seeking a high-impact role where clean code, system performance, and user experience are shared priorities.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, ASP.NET, ASP.NET Web API, RESTful API Design, JWT Authentication

Databases: MongoDB, Microsoft SQL Server (MSSQL), Query Optimization, CRUD Operations

Tools & Workflow: Git, GitHub, VS Code, Postman, Figma, Agile / Scrum, SDLC

Concepts: Role-Based Access Control (RBAC), OOP, Database Management, API Integration

PROFESSIONAL EXPERIENCE

MoroSoft Technologies — Rawalpindi, Pakistan (On-Site)

Jan 2026 – Present

Associate Full Stack Developer

- ▶ Architect and ship **production-grade full-stack features** independently using React.js, Node.js, and Express.js — owning both frontend component logic and backend service layers, reducing feature delivery time by an estimated **~30%** compared to initial onboarding baseline.
- ▶ Design, build, and version **RESTful APIs** with clean separation of concerns — enabling seamless integration between client interfaces and data layers across **3+ concurrent application modules**.
- ▶ Optimize **SQL Server queries** for reporting and transactional workflows in live multi-user environments, achieving approximately **20–25% improvement in query execution speed** through targeted indexing and query restructuring.
- ▶ Drive code quality within **Agile sprint cycles** — leading peer code reviews, enforcing reusability standards, and contributing to sprint retrospectives that improved team velocity by roughly **~20%** over 3 iterations.
- ▶ Integrate **third-party services and JWT-based authentication flows** across multiple modules in close collaboration with senior engineers, reducing authentication-related bug reports by an estimated **~40%** post-implementation.

Stellar Communication Pvt Ltd — Rawalpindi, Pakistan

Jun 2023 – Nov 2023

Technical Support & Data Operations Intern

- ▶ Managed and maintained **CRM databases and structured client records**, applying data-handling discipline and systematic documentation practices directly aligned with software project coordination workflows.
- ▶ Resolved high-volume client queries and escalation workflows, developing **cross-functional communication and stakeholder management skills** applicable to agile software engineering environments.

EDUCATION

Barani Institute of Information Technology (BIIT) — Rawalpindi, Pakistan

2022 – 2026

Bachelor of Science in Computer Science

Relevant Coursework: Data Structures & Algorithms | DBMS | Software Engineering | Web Technologies | OOP | Computer Networks

Society Activity: Attended Laravel Workshop by BIIT CS Society — covering MVC architecture, routing, Eloquent ORM, and RESTful application development.

KEY PROJECTS

Al-Quran Online Academy Portal / [React.js](#) / [Node.js](#) / [MongoDB](#) / [Express.js](#)

- ▶ **Architected** a fully responsive MERN-stack Online Academy Portal, reducing estimated student onboarding drop-off by approximately **~35%** through an intuitive multi-device UI that cut registration steps from 8 to 4.
- ▶ **Engineered** a 3-Day Free Trial registration workflow with built-in WhatsApp routing and **real-time automated email alerts**, improving trial sign-up conversion by an estimated **~45%** versus manual outreach baseline.
- ▶ **Centralized** academy operations into a single **Super Admin Dashboard** managing 100+ global student inquiries, trial approval pipelines, and live course package configuration — eliminating the need for 3 separate admin tools.
- ▶ **Secured** the platform with **Role-Based Access Control (RBAC)** and **JWT session management**, achieving zero unauthorized data-access incidents across admin and student roles in testing.

BIIT Academic Calendar System / [React.js](#) / [Node.js](#) / [MSSQL Server](#) / [Express.js](#)

- ▶ **Engineered** a full-stack campus operations platform automating scheduling, exam management, and academic coordination across **5+ BIIT departments**, reducing manual scheduling overhead by an estimated **~60%**.
- ▶ **Automated** exam date sheet generation and seat number assignment for **500+ students** via a dynamic Admin/DataCell module, cutting administrative processing time by roughly **~70%** per exam cycle.
- ▶ **Delivered** a Chairperson portal consolidating FYP group management, supervisor allocation tracking, and departmental oversight — replacing 2 legacy spreadsheet workflows with a single real-time interface.
- ▶ **Optimized** MSSQL Server queries for multi-user concurrent scheduling reads, improving page load performance by approximately **~30%** through strategic indexing on high-frequency student dashboard queries.

Pharmacy Management System / [C#](#) / [ASP.NET](#) / [MSSQL Server](#)

- ▶ **Developed** a role-based inventory and POS management application automating stock tracking, billing, and supplier workflows — eliminating manual stock-count entries for pharmacy operations.
 - ▶ **Implemented** real-time low-inventory alerts, batch tracking, and expiry date monitoring with **SQL-optimized queries** supporting catalogs of **1,000+ medicine SKUs** with sub-second response times.
-
